Garlic - Parsley is an exclusive scientific formulation consisting of herbal and natural ingredients that has been used for centuries in Chinese Medicine and finds itself linked to many uses by ancient cultures. Numerous studies done in many different countries show that it may help maintain cholesterol levels that are already within the normal range. Both Garlic and Parsley may have antimicrobial properties that can help support immune system function. Now formulated with Garli-Eze®, the allicin content has been better stabilized. Allicin is considered to be one of the compounds most responsible for the pharmacological benefits of garlic.

The Wachters' Exclusive Blend of Sea Vegetation® is the key ingredient that makes this formula unique. *
