

# **75% of Americans are Calcium Deficient!**

That's what the Surgeon General reports. More than 1 in 10 Americans either has, or is at risk for, developing osteoporosis. When our Calcium levels drop too low, it is "borrowed" from our bones and teeth.

If these 200,000,000 Americans knew how easy it would be to increase their Calcium intake, they would never have an excuse for being Calcium deficient.

They would use Wachters' No. 15 – Calcium-Magnesium-Vitamin C product!
