

# A Formula Just for Women? *Here's Why!*

Historically, inequities in research, health care services, and education have placed the health of women at risk. Wachters' has consistently encouraged women – and men - to take personal responsibility for their own health and wellness.

Because women's health depends upon maintaining a delicate hormone balance, special nutrient factors are needed. Unlike men, women's hormone levels are fluctuating continually. When provided with gentle and specific support from carefully chosen herbs and nutrients, many of the uncomfortable effects of naturally fluctuating hormones can be mediated.

Wachters' Lady Nouvelle is carefully formulated to provide women with steady energy, even moods and restful sleep. This formulation is particularly supportive of women entering the middle years of life. At this time, the hormone levels fluctuate more widely, often causing hot flashes, extreme mood swings and sleeplessness.

## No. 48 L a d y N o u v e l l e
