Product Specification Information**

No. 19 - N-er-G

Product Code 5137 – 30 – 1.5 mg packets in each canister
Recommended dosage: mix one packet in 8 oz. of water or juice.

In our increasingly pressured world, having enough energy to get through the day is often a challenge. We begin to fade in mid-afternoon and drag ourselves through to the end of the day.

Could you be re-energized by the sun? Of course! What would you think if you discovered that you could *drink* the energy of the sun? That the sun's energy in every package of No. 19 - N-er-G?

Wachters' slogan captures how this happens.

"From Sun to Sea to Cell"

The radiant energy of the sun is trapped by the light-absorbing pigment Chlorophyll in the ocean's seaweed. This miraculous process is photosynthesis. We remember photosynthesis from our science classes.

Chlorophyll is found in marine algae as well as in more complex plants. This green pigment, composed of carbon, hydrogen, oxygen, nitrogen and magnesium, plays a key catalytic role in photosynthesis, the process of transforming light energy into chemical energy.

When the seaweed is harvested for human consumption, the energy of the sun is absorbed by the human cell.

The packaged power of Chlorophyll has many other uses that the late Bernard Jensen has documented in his book, "The Healing Power of Chlorophyll." (See the Product Specifications for Wachters' No. 41 - Liquid Dietary Chlorophyll for a complete explanation of how Chlorophyll works in the human body.)

Wachters' has transformed the Chlorophyll into a high power nutritional beverage mix which helps increase energy and reduce fatigue. Individuals have commented on how effectively a package of No. 19 has given them a significant energy lift within 20 minutes.

The Nutritional Functions of the Ingredients

Active ingredient	Function
Chlorophyll	<ul style="list-style-type: none"> • May serve as a catalyst for making oxygen more easily available to the cells • May serve as a detoxifier. • Aids in reducing various body odors. • May act as a blood cleanser. • Can help relieve constipation • May help protect against some toxins and may ease some drug side effects • May be helpful in the treatment of calcium oxalate kidney stone disease • May also have some antiatherogenic activity • May have antimutagenic and anticarcinogenic activities
